Activity Nr 3

1	Name of the Activity:	Monitoring and publishing reports and studies on Mosul conditions under the control of ISIS militia group.
2	Donor:	Voluntary Work done by IID members
3	Date:	2016
4	Location:	Offices of the Iraqi Institution for Development, Erbil
5	Description of the Activity:	<p>IID has published two new studies in 2016 on the situation of children in Mosul under ISIS terrorist regime. The purpose of the studies is to clarify and explain to the civil society the violations and terror committed by ISIS against the people of Mosul, especially children, and how ISIS was seeking to create a criminal bloody generation through following strategies which were applied in Mosul and specifically in the field of education and mechanisms to instill radical thoughts. Our studies published in Arabic and translated into English and it is as follows:</p> <ol style="list-style-type: none"> 1. On 15/1/2016 a study was written entitled: " Education in the City of Mosul under the Control of ISIS Terrorist " . 2. On 28/6/2016, a study was written entitled: " Instilling the Ideas of Extremism in Children through Education, Influences and Psychological Changes " .

Establish extremism ideas in children through education,
influences and psychological changes

Iraq – Nineveh Governorate
Mosul City

Issue: June 28, 2016

**Establish extremism ideas in children through education,
influences and psychological changes**

Report #1
June 10, 2014 to May 31, 2016

Since June 10, 2014 the children in Nineveh governorate living in difficult and complex psychological conditions, following the events of ISIS control on the most governorate he puts some commitment laws for people to behave and acts habits were not previously present in their daily lives and tradition, which have had a negative influencing on the psychological of people in general and especially children who are in areas dominated by the ISIS. The scenes of violence, murder and bombing that exercised by ISIS people in front of and view by children, also sometimes they are forcing them to attend these scenes, and through the practice of torture in public places where the children attend just like adults to watch the execution of those who named as infidel "Unbeliever" or to punish those who do not follow their rules who named "Apostates" or to implement punish (Al-Had) who broke their instructions and other fake reasons that are capable to cut human head, thrown from a high building, burned alive or sinking victim a live and other different innovative methods of killing then, ISIS recorded and displayed them in large screens located in public areas, or is placed these movies on CDs to distribute it to children and ask them to see it, or through post images across social media sites, where some of these movies presented by ISIS that there are children in the front rows, There is no doubt these horrific scenes have massive negative psychological effect when seeing them.

children when seeing such continuously actions it will become involuntarily part of their behavior, some psychologists specialized in the past month in May 2016 monitor (50) children from Mosul when they are playing in the street, they noticed that (43) of children had been playing in a brutal manner through use a wood pieces as knives and guns, the copying ISIS actions in the killings and slaughter, this exactly what ISIS looking for to create a violent generation believe in ISIS propaganda however, this become high danger that after liberation of areas that controlled by ISIS, and how to find plans to eliminate these concepts that have been set in children minds.

ISIS also deliberately to open training camps for children and adolescents in towns seized that by transferring institutes, institutions and some schools to be training camps, it will aim to teach children fighting and consolidate the ideas and beliefs of ISIS, they got lessons about killings and bombings, ISIS seeks to use them in suicide bombings inside or outside Nineveh. According to statistics published by the United Nations that between 800-900 children were kidnapped by ISIS, from Mosul Iraqi city in 2015 only, to train them religiously and militarily, ISIS recruitment of children by force. we do not know the real number of child have been soldiers. However, in every statistic shows increasing number of recruited children by ISIS, he tries to attract from schools, sports centers and orphanages, by putting his elements among children in public places and roads, where he opened offices has only one mission is recruiting children called "cubs of Al-Kelafa."

Establish extremism ideas in children through education,
influences and psychological changes

Iraq – Nineveh Governorate
Mosul City

Issue: June 28, 2016

About 40% of children are from kidnapped minorities and especially from the Yazidis, Turkmen and Shabak, were ISIS killed or captivity their families and take them away to orphanages or schools belong to him to ensure they grow up and educate based violence, fighting, unbelieving others concepts, hating their parents and try to change their religion and sects approach, these things certainly have deep impacts on the psyche and the mentality of children that caused setbacks and shocks to them.

It also should focus on children that ISIS sold them by money either the sales operations inside or outside Iraq, according to the information we have that there are 312 children were sold, the majority of them had been exposed before of sale operations to abuse and torture by all means. It has interviewed a group of children who arrived to their parents, they sure that they are in unstable and not good psychological and health situation, and they need psychological care to treat the symptoms of fear, anxiety and psychological trauma they suffer, as we have speech with a psychiatrist in Mosul and asked him about the extent of trauma exposed children in Mosul, Dr (A.M) assured they had received 128 children from the month of January 2016 to May 2016 were they subjected to psychological trauma as a results of slaughter and murder occurred in front of them.

ISIS Showed interest in school and educational process (Please see the links below for the curriculum), where the first step he did when he seized the city is changed the curriculum to anew package inciting terrorism and violence, including what called Jihadi education that includes planting ideas of extremism in their minds, training on use weapons, firing live ammunition, and engage battles, change the lessons of sport and art to fitness who learns through fighting skills and singing ISIS logo "continue (or persist and remain) and expand. ISIS members also use to put their children wearing (Afghan uniforms) among other children to attract the and try to influence them.

UN report revealed that on last 11 May, a recruiting unit of ISIS visited schools' in Al-Tamen area in north of Mosul and ask children to declare allegiance and join them, that horror the children, which led to prevent parents from sending their children to schools, universities and only limited to ISIS member's children, that produce discontent and confusion for children and adolescents and loss of years without right education.

ISIS prevent manifestations of celebration and jubilation in the public and private events, also close of some parks that so creating depression for children in Mosul and make them isolated
